PROFESSIONAL SUMMARY

Objective: Full-stack web development with emphasis on Laravel and React, combining direct user communication with software engineering best practices.

Software Engineering undergraduate at UDF — Centro Universitário do Distrito Federal, with a technical degree in Systems Development from SENAI-DF. Currently interning at DF Informática, where I develop and maintain web systems, handle direct client support, and gather requirements. Experienced in technical presentations to diverse audiences — including events such as Mundo SENAI, which drew interest from the agribusiness sector. Collaborative, empathetic, and committed to continuous learning.

TECHNICAL SKILLS

- Programming Logic
- Databases: MySQL
- Back-end: Python, PHP, Laravel
- Front-end: HTML, CSS, JavaScript, React
- Mobile: Flutter, React Native
- App publishing: Google Play Console, Apple App Store Connect
- REST API development and integration; payment gateways (Mercado Pago, Cielo, Asaas)
- Version Control: Git and GitHub
- Low-code / prototyping: Lovable
- UI/UX fundamentals applied to web interfaces (usability, visual hierarchy, and responsiveness)
- Requirements gathering with users (interviews and needs validation)
- Excel (spreadsheets, queries, and data management)

EDUCATION

Software Engineering — UDF — Centro Universitário do Distrito Federal

2025 – Present | Brasília, DF, Brazil

Technical Degree in Systems Development — SENAI Taguatinga

2024 – 2025 | Taguatinga, DF, Brazil (concurrent with high school)

High School — SESI-SENAI DF

2024 – 2025 | Taguatinga, DF, Brazil

EXPERIENCE

Software Development Intern — DF Informática

2025 – Present | Brasília, DF, Brazil

- Developed web systems using PHP, Laravel, HTML, CSS, and JavaScript
- Maintained, debugged, and improved existing systems
- Performed MySQL database queries and data manipulation
- Contributed to company client projects: API integrations, payment gateways, and app publishing on Google Play and Apple App Store
- Applied UI/UX principles to improve user flows and interfaces
- Provided direct client support for requirements gathering, active listening, and issue resolution
- Participated in planning meetings and project follow-ups
- Applied version control with Git and programming best practices

Professional deliverables — client projects (DF Informática)

Development, integrations, and maintenance on systems delivered by the company to its clients. Company/client projects — not personal authorship.

iDucali — Management system and leads (client)

sistema.iducali.com.br

- WhatsApp API integration for lead communication
- External purchase links (Hotmart) and cross-industry lead connections via scripts
- Mercado Pago payment integration

Calheiro Orça Fácil — App and web (client)

app.calheiroorcafácil.com.br | [App Store](#) | [Google Play](#)

- Contributed to publishing and maintaining the app on Google Play (Android) and Apple App Store (iOS)
- Asaas integration for payment processing
- Built with Flutter/React Native and Laravel back-end

Psykhedh — Clinic website (client)

psykhedh.com.br

- Institutional website with artificial intelligence integration
- Responsive interface and digital care flows

Autentica by Silvia — E-commerce (client)

autenticabysilvia.com.br

- Online store with catalog and checkout
- Transactional email delivery and Mercado Pago and Cielo integrations

TendTudo Jaru (client)

tendtudojaru.com.br

- Google Maps integration for location and user experience
- Web development with REST APIs and responsive UI

Administrative Assistant & Customer Service — Payroll Loan Company

2023 | Brasília, DF, Brazil

- Queried CPF records and verified eligibility in banking systems (supplementary withdrawal, FGTS, anniversary withdrawal)
- Communicated with clients via standardized messages for prospecting and contract closure
- Organized data and managed records using Excel spreadsheets

Academic and Personal Projects — Software Development

Ongoing

- Developed web and desktop applications using Python, PHP, Laravel, HTML, CSS, JavaScript, React, and MySQL
- Created management systems, REST APIs, and responsive interfaces
- Repositories available on GitHub

Featured Project: Automated Irrigation System — 2025

- Interdisciplinary project integrating programming, electronics (Arduino), mobile app (React Native), and responsive landing page
- Responsible for the back-end, landing page development, and hydraulic assembly of the system
- Showcased at Mundo SENAI (SENAI's flagship institutional event), at the SENAI IT event, and at the SESI Science Fair, attracting interest from agribusiness buyers
- Led public presentations of the project at all events, communicating clearly to both technical and non-technical audiences
- Technologies: Arduino, Python, MySQL, HTML, CSS, JavaScript, React Native
- Project landing page (AquaFloww): aquafloww.site

CERTIFICATIONS

8 completed certifications — verifiable metadata for ATS screening and credential ID validation (Cisco Networking Academy).

ADDITIONAL COMPETENCIES

Tools and Technologies

- Git and GitHub
- Flutter and React Native
- Google Play Console and Apple App Store Connect
- Lovable (low-code prototyping)
- Arduino and automation projects (IoT)
- Agile methodologies (Scrum and Kanban)

- Microsoft Office Suite (Word, Excel, PowerPoint)

Soft Skills

- Clear communication, technical presentations, and project leadership
- Teamwork and collaboration
- Problem-solving and analytical thinking
- Adaptability and continuous learning

Extracurricular Activities

- Catechist and youth group member — developed teaching skills, patience, and communication with children and teenagers
- Peer mentoring at university — supporting classmates with programming and Git/GitHub
- Regular practice of futsal, football, weight training, and judo — discipline, teamwork, and respect

LANGUAGES

- Portuguese — Native
- English — Elementary / A2 (technical reading and developing professional communication)
